WHO WE ARE

Global Concrete Export is a design, House deliberately working to produce handmade objects which are smart and are least harmful to the environment. concrete has always. been the primary ingredient to showcase our finesse. spanning across different medium like form. color, shapes, texture and character, we strive to develop products that are hand casted and in association with various local craftsmen. We have (Re) developed new techniques of mold & dye making and finishes of like sand, air entrained finish terrazzo etc.

Global Concrete Export Create eco friendly carbon neutral products which stand out in every setting.

HOW WE STARTED

We started our workshop in small warehouse in udaipur in 2018. currently we manufacture everything in GFRC like GARDEN PLANTERS, TABLE PLANTERS, SEATING BENCHES, SEATING STOOLS, TILES, PANELS Many more. our team consists of highly skilled mould makers, patterns makers, carving person, casting people and some hardworking craftsmen, who have a Sharp eyes in the details.

Our team has an experience of 8-9 years in GFRC CONCRETE Industry.

MATERIAL

CAST CONCRETE / GFRC

concrete is made largely materials derived from nature itself. to make cast concrete we use several ingredient like glass fibers, cement, pigments, quartz aggregates and varrious admixture the consistent mix is achieved every single time with time our streamlined process & fixed material .However due to the nature of the material, there may be come variation in colour and surface texture this means some variatio n may occur between batches & should be taken into consideration.

our material doesn't require any metal as reinforcement up to an extent as glass fiber has equivalent tensile strength is long lasting and never rust. Hence allowing us to make super thin products with equivalent strength as metal reinforced concrete.

MANUFACTURING PROCESS

Our manufacturing process follows a well structure & quality controlled process. Hence we make sure that our outcomes is error free. every single time.

ADVANTAGES OF CAST-CONCRETE

Cast concrete products made by Global Concrete Export have least carbon footprint as it has a life of more than 100 years, highly durable, low maintenance use locally available material & a team of local craftsmen. We add value enviornmenttly, socially.

- **Enhanced performance**
- **Designer element**
- **Customization**
- **Faster**
- **Affordable cost**
- **Low maintenance**
- **Low dust deposition**
- **Longer life**
- **UV protection**
- **Very high resistance to weather**

CUSTOM COLOR & TEXTURE

Global Concrete Export use the best quality of germen-made pigments. we have standard color option, mostly blended from **RED, YELLOW** And **BLACK**. We also offer custom color option as per requirements.

Color swatches

Actual colors may vary slightly on digital screens & prints

CUSTOMISATION PROCESS

Request a quote

send us your project details and we will send you a quote.

Consultation & Designing

We will be happy to help you in designing & consulting.

Shipping

We will pack the products ship it safely.

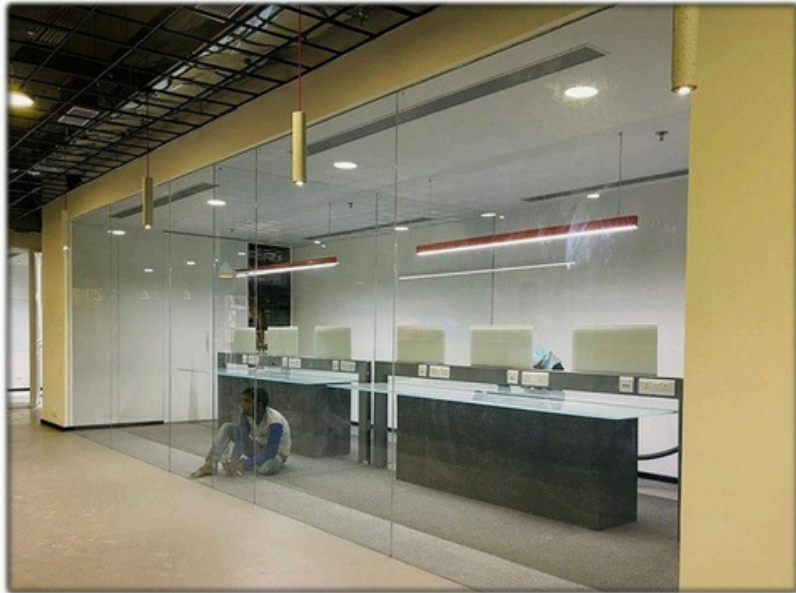

Design Approval

After approving the design color and size, we will get it casted in least time possible.

INNOVATION & TECHNIQUES

We are always ready to hands on with techniques and innovative material feel free to discuss any ideas and process, we will be glad to shap it into a reality.

GARDEN PLANTERS

We make the finest quality products for garden. because what is better than a products which has a life of 100s years it can be casted in any custom shap and have a capacity for mass - production.

Our GFRC planter are approximately 1.7 times dens. 0.6 time thinner & undobte -dly stronger than ordinary cement planter they are hand casted with 4 layers of our standardized mixture which including pigmented front coating which I asts for a lifetime. unlike painted cement planter and 3 layered back coating with a high quality fiber glass concrete mix. which make the planter stronger enough to last lifetime.

GFRC
Facade

GFRC Wall Panels

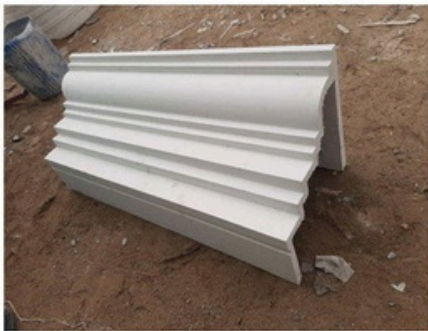

Size - 2000x200mm

GFRC is used to produce architectural features like columns, capital, bracket, moulding, pedestal, handrails, balustrade, windows & door surrounding, arches and a lot more. GFRC's ability to be moulded in complex shapes and contours and replicate fine details makes this material an ideal choice for architects and engineers, whilst often cast with a thickness in excess of 25mm, these products remain easy to handle and erect and permit the architect or engineer an unrivalled freedom for creative design.

Our Products

GFRP Cornices

GFRP Balustrade

GFRP Capital

GFRP Dome

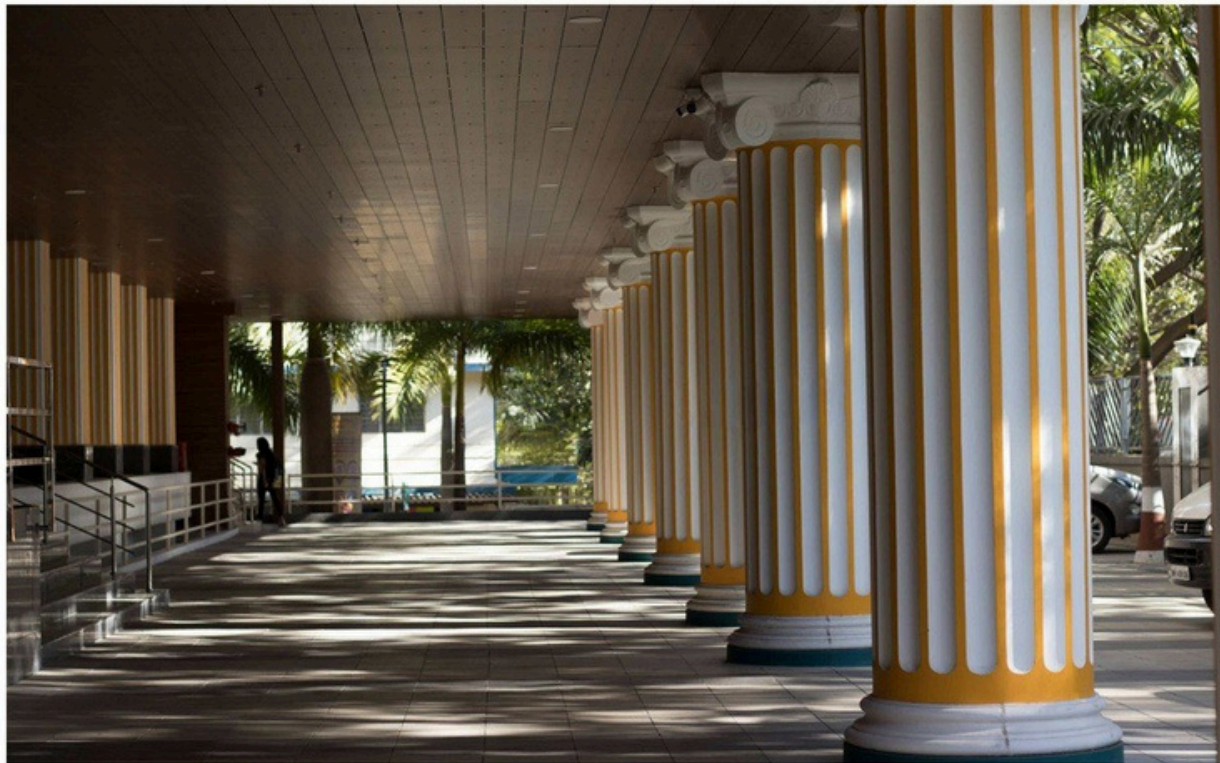

GFRP Keystone

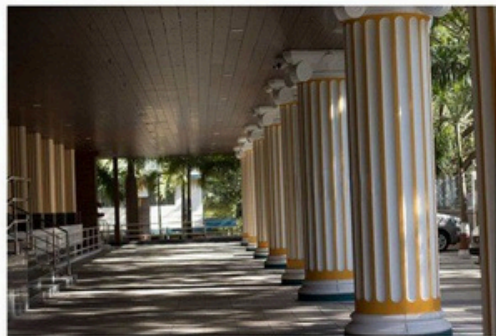

GFRP Window

GFRC columns

GFRC columns are generally cladded on to concrete columns to create a decorative and visually appealing element. These can be produced in white smooth (ready to paint) finish or in pigmented / sand finish.
